

## Activating Intelicode

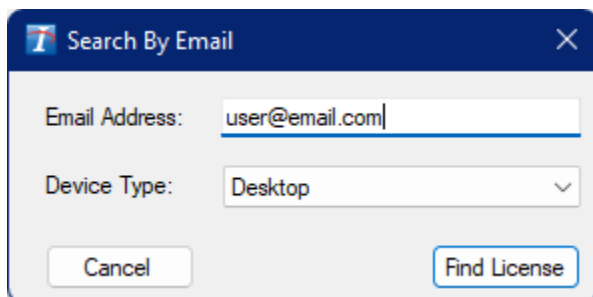

To activate Intelicode you will need to click the “Activate Intelicode...” button on the activation dialog.

Click the “Activate by Account...” button

Then enter the email address that you have registered to your user account, select your device type, and click “Find License”. Upon successful activation a confirmation dialog is presented.

At initial install Intelicode is preactivated for a 30-day trial. After purchasing a license, you can use the above process to activate. The trial is a full version of the software without limitations.
